

LIDES
LIGHT IN DESIGN

Exterior lighting 2023

Founded in 2012, LIDES aims to furnish the market with elaborately detailed and high-quality lighting that meets demands from the most discerning customers.

The lighting is designed with an emphasis on functionality, to light up the space as needed and enable control compatible with modern technologies available on the market.

A beautiful design element in and of themselves, the lights serve as the main source of illumination while allowing for adjustable brightness to lend the space an atmospheric and relaxed ambiance.

Our assortment combines the beauty of glass and light, art and modern technology, resulting in a unique and unforgettable experience.

In addition to glass, our fixtures incorporate other high-quality materials such as metals with one-of-a-kind surface finishes and uniquely cut Swarovski® crystals.

We provide post-warranty service and renovation for all our products.

Where tradition meets innovation.

A fusion of art and functionality.

A new way of looking at light.

A unique design.

Hand-blown glass lamps

that add character to any space.

Ocean

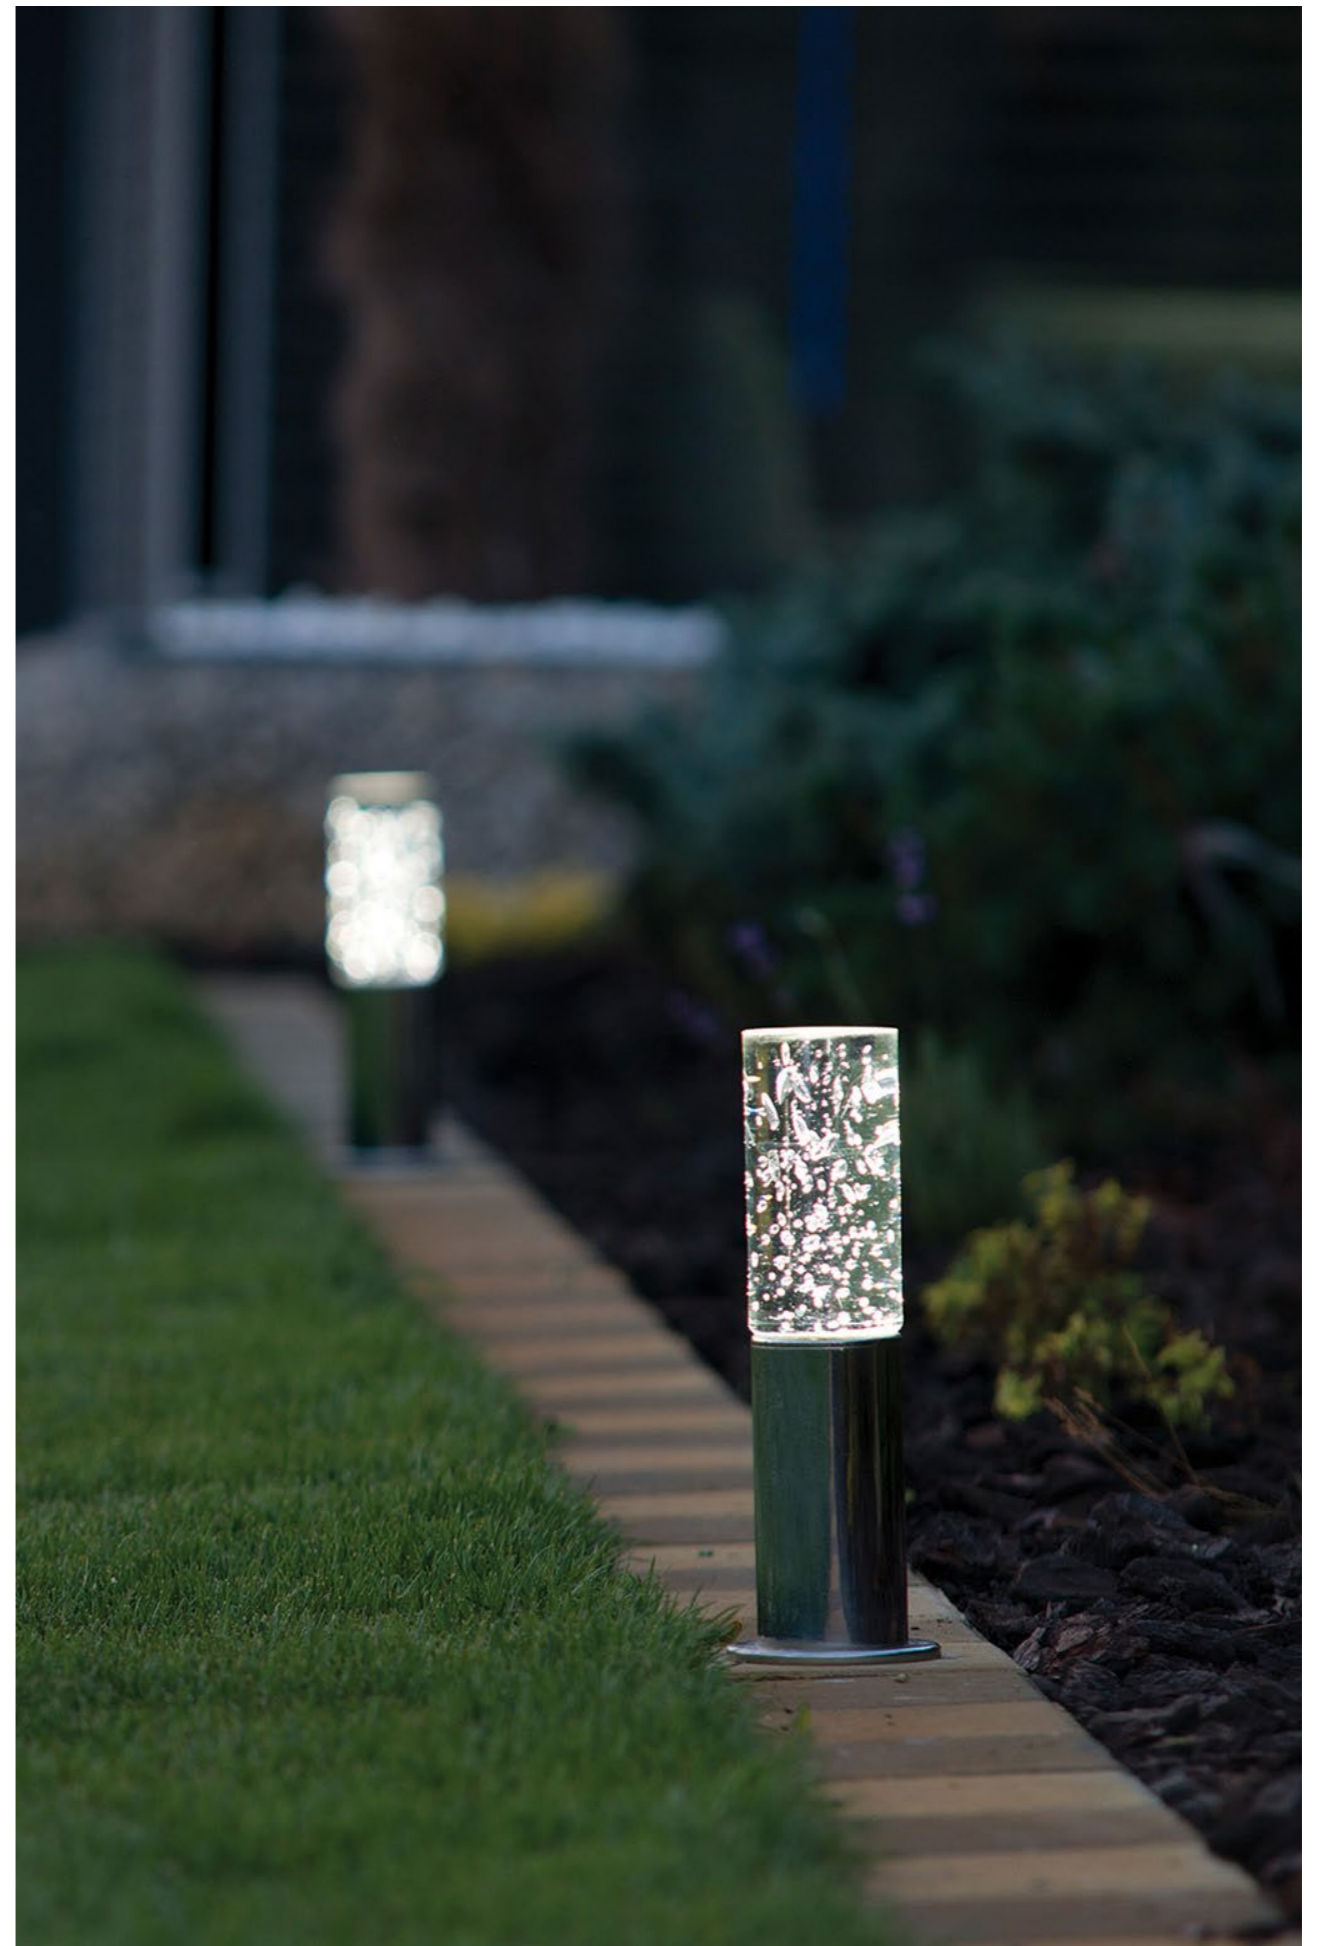

Clean design

Beauty of the hand-blown glass stands out in clean lines of the lighting. Air bubbles caught in the glass subtly reflect the light into space and create a pleasant evening atmosphere. With its design, Ocean is the jewel of any space, even in daylight.

Resilience

The Ocean collection combines the mastery of glass craftsmanship with high-quality design and first-class materials, such as stainless steel. Maintenance is easy and individual parts can be refurbished.

Ocean collection

The glass shade and stainless steel base are available in several heights for variety.

This create space for their variable use.

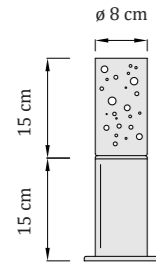

Lamps can be used as line lighting for sidewalks or as garden lighting with an irregular layout.

We recommend groups of 2 to 3 lamps in different heights.

Lamps are fixed to solid bases.

Ocean Art

hand-forged exterior lamp

Ocean Art embodies the precise work of a blacksmith's craft and, combined with its crystal clear glass, can grace any garden as an artistic piece.

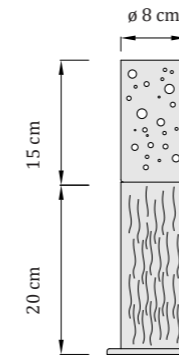

A patina is applied to the surface of the lamp, which makes for a unique appearance with a rustic touch. Thanks to the blacksmith work, the lamp fits with even more lavish spaces perfectly.

Ocean Wall

Wall lamp made of hand-blown glass

An elegant outdoor lamp that will stand out also in modern interiors. Suitable for high-humidity environments such as spa and wellness areas.

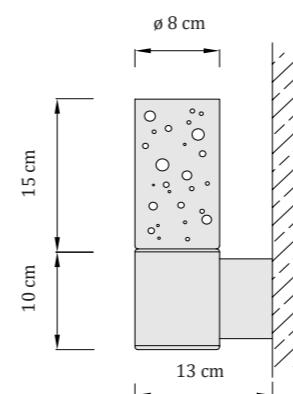

Air bubbles trapped in the shade of crystal clear glass refract the light beautifully. As a result, the light casts impressive irregular rays on the wall.

RAY

Exterior lamp made of polished stainless steel

An ideal solution for highlighting the beauty of any garden at night, Ray spotlights are great for emphasizing individual elements such as trees, bushes, flower beds or special architectural features.

Beam lighting can also be used to create a sense of security and safety around the grounds of the house by illuminating dark areas.

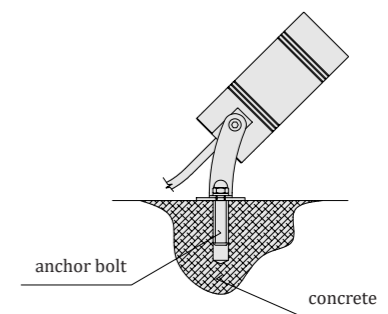

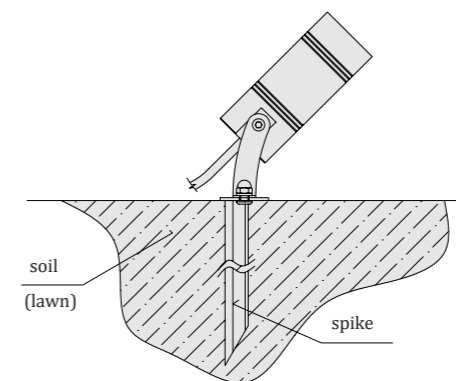

Beam angle

15°

40°

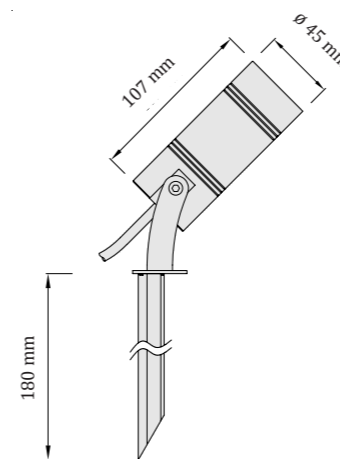

RAY lamps are adjustable in all directions.
They are anchored to the soil using a metal spike or to solid materials using an anchor bolt.
