

LIDES

LIGHT IN DESIGN

Interior lighting 2023

Founded in 2012, LIDES aims to furnish the market with elaborately detailed and high-quality lighting that meets demands from the most discerning customers.

The lighting is designed with an emphasis on functionality, to light up the space as needed and enable control compatible with modern technologies available on the market.

A beautiful design element in and of themselves, the lights serve as the main source of illumination while allowing for adjustable brightness to lend the space an atmospheric and relaxed ambiance.

Our assortment combines the beauty of glass and light, art and modern technology, resulting in a unique and unforgettable experience.

In addition to glass, our fixtures incorporate other high-quality materials such as metals with one-of-a-kind surface finishes and uniquely cut Swarovski® crystals.

We provide post-warranty service and renovation for all our products.

Where tradition meets innovation.

A fusion of art and functionality.

A new way of looking at light.

A unique design.

Hand-blown glass lamps

that add character to any space.

Ocean Up

Ceiling lamp crafted of hand-blown glass

The Ocean collection was inspired by the unbridled quality of water element.

The churning water is represented by air bubbles trapped within glass.

Hand-blown glass crafting is an art form that requires a lot of skill and attention to detail, thus making each piece an original work of art.

Ideal for spa and wellness areas

The Ocean Up was designed especially for spas and saunas.

However, it will prove its worth also in spaces such as corridors,

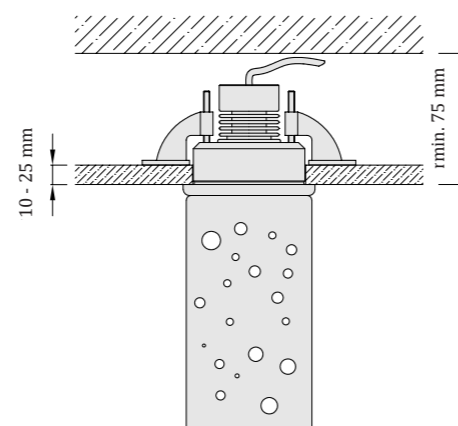

bathrooms, and suspended ceilings in exteriors.

Ocean Up is available in several colors of emitted light. It is the cool white

version that brings out the beauty of the glass shade most, though.

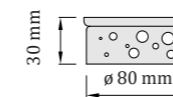

TIP: Use a combination of lamps of different heights irregularly distributed within the space: 1 to 2 lamps per 1 m².

Fagus

Recessed stainless steel lamp

The Fagus is intended for installation in the ceilings of houses and other outdoor objects. However, it fits modern interiors too, suitable for lighting high-humidity spaces such as bathrooms or spas.

The lamp comes equipped with a diffused polycarbonate visor with a 180° radiation angle and a cover in 3 versions – polished stainless steel, golden gloss and white matt.

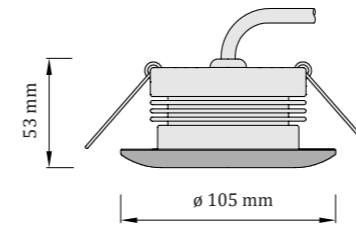

Surface finish

-  polished stainless steel
-  golden gloss

Dian

Stainless steel spotlight fixture

The main features of the Dian lamp are small dimensions and high luminosity relative to its size.

There are 2 light angles to choose from – 15° and 40°. Due to its narrow light beam, Dian is suitable for places that can benefit from its minimalist design or it can be used to highlight special design parts of the interior.

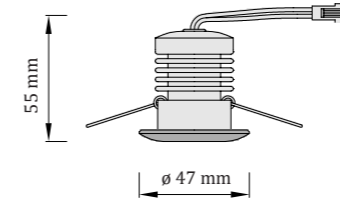

Surface finish

-  polished stainless steel
-  golden gloss
-  white matt

Teardrop Single Mini

suspension lamp

An elegant design element, Teardrop Single lamps boast a wide range of uses.

They are suitable for lighting dining tables, kitchen islands, bar counters, stairways, but also bedside tables or areas near mirrors.

The lamps are supplied with a standard, 2 m suspension cable.
On request, it is possible to make lamps with atypical cable lengths
and develop a proposal for their layout.

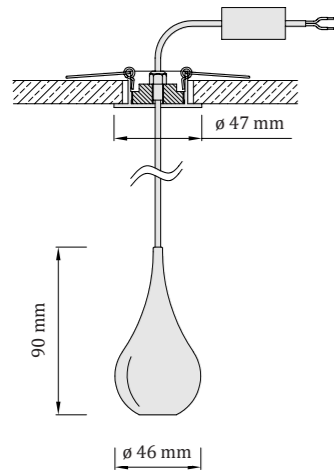

TIP: To illuminate the dining table, you can use 12 - 18 lamps
arranged in 2 rows and lowered at different heights.

Parachute Single

suspension lamp

Parachute Single collection can be put to many versatile uses. Various groupings can be formed by the lamps to serve as the main lighting for dining tables, kitchen islands, bar counters, stairways, but also bedside tables.

As standard, the lamps are supplied with a 2 m suspension cable.

On request, it is possible to craft lights with atypical cable lengths and develop a proposal for their layout.

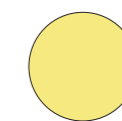

Bubbles trapped in glass

A special glassmaking technique is used during glass-blowing to form air bubbles in the glass, which refract and reflect light. The presence of bubbles creates a beautiful shimmering, sparkling effect.

By combining several colour shades, you can create a unique artwork.

Aurora

suspension lamp

Aurora epitomizes the attention to detail and design creativity of the glass craft. The beauty of shades lies in their shapes, each one unique, which arise by virtue of the handmade production.

Irregular cuts create the many planes of the hand-ground shade, which is not only a functional lamp but also a work of art.

This elegant design element is ideal for lighting bar counters and kitchen islands.

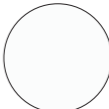

Aurora mini

suspension lamp

The Aurora collection of lamps is available in 2 sizes, with glass shades in 3 color versions: crystal, champagne and amber.

As standard, the lamps are supplied with a 2 m suspension cable. On request, it is possible to craft lamps with atypical cable lengths and develop a proposal for their layout.

Crystella Wall

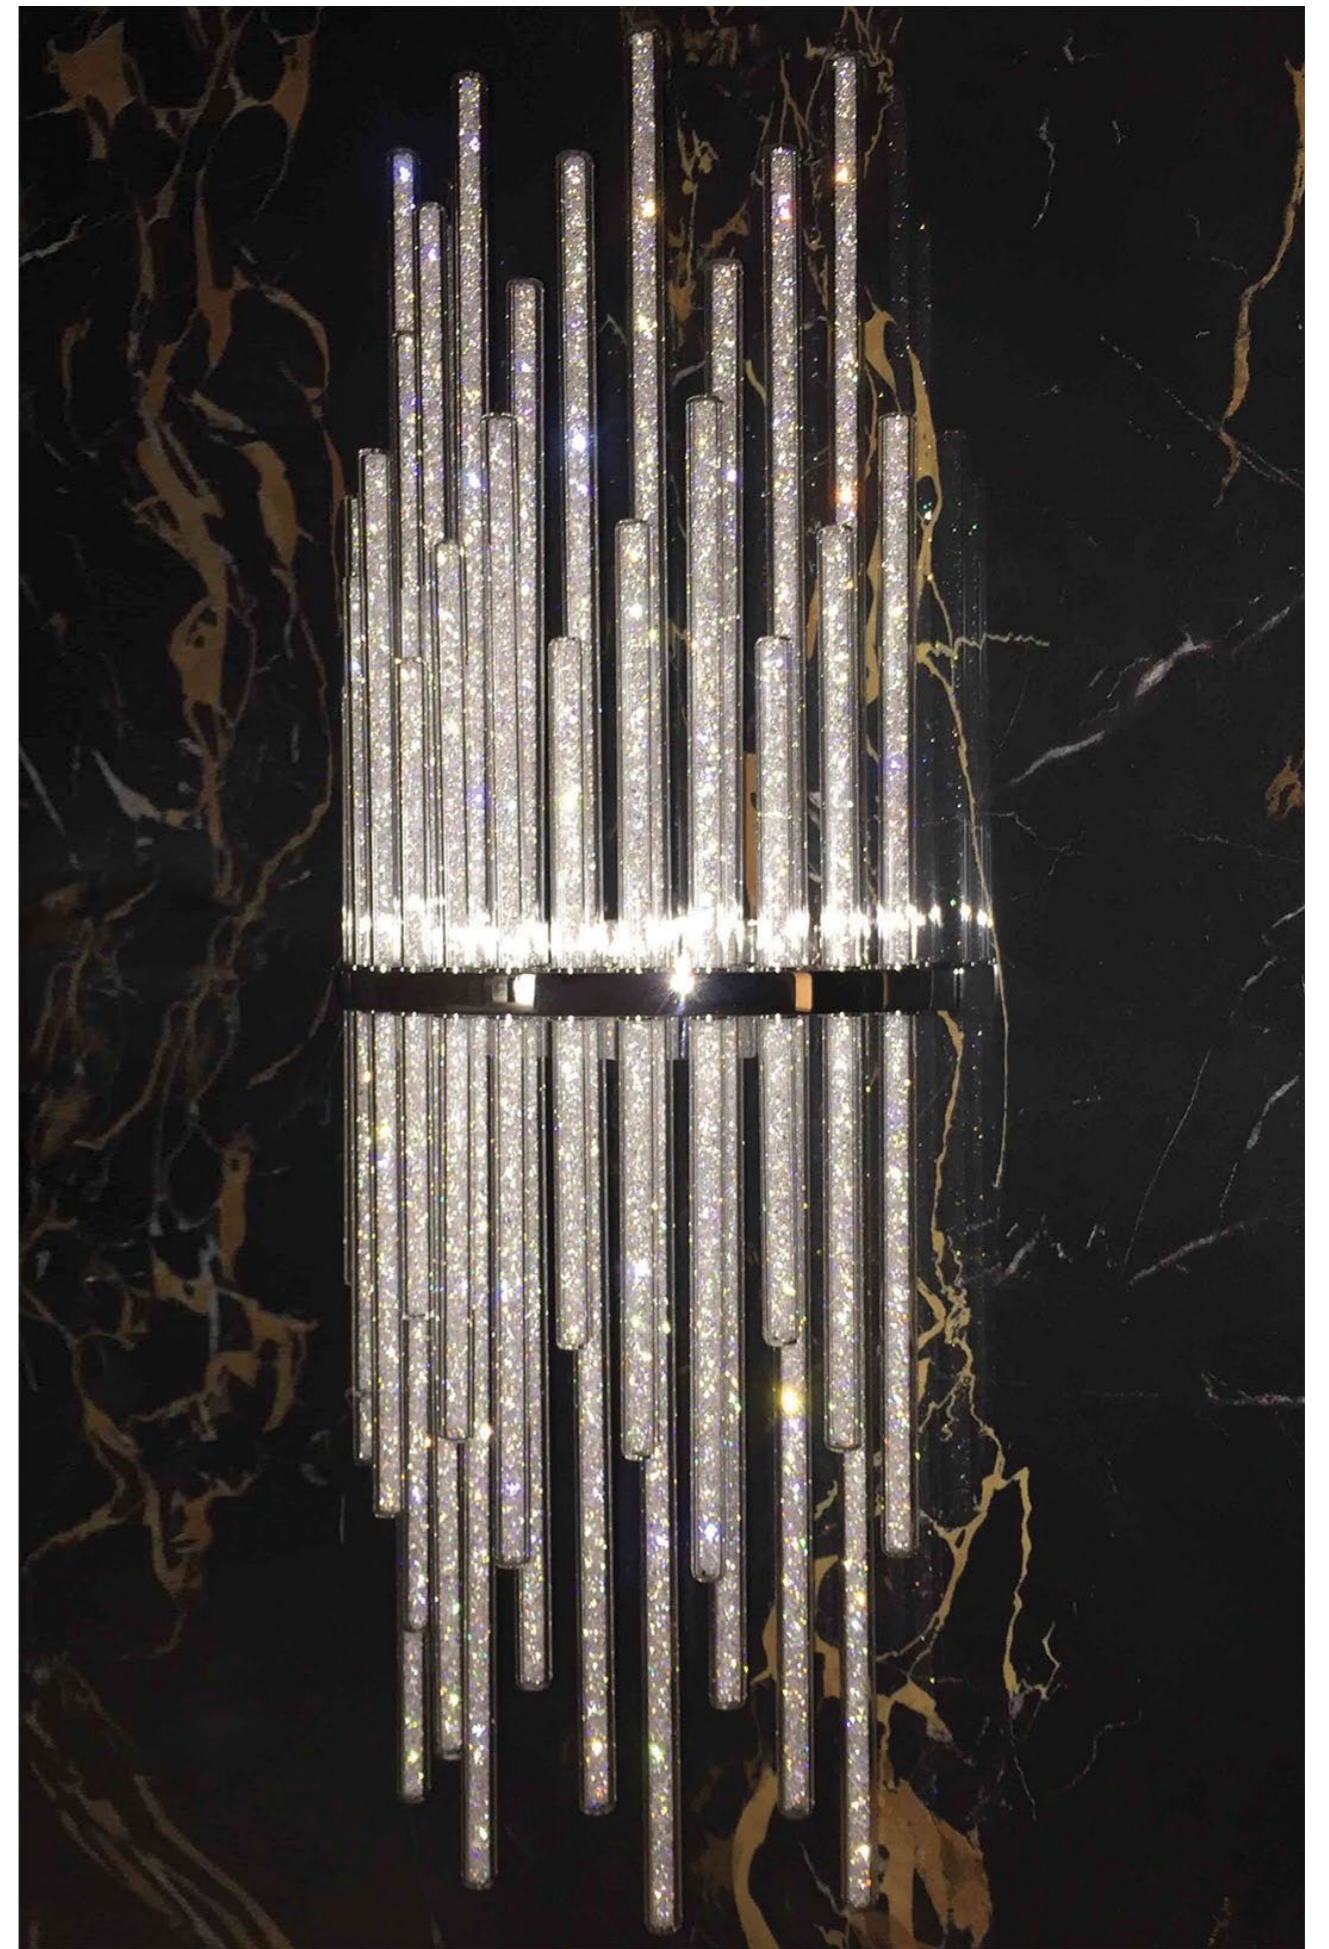

Wall lamp with Swarovski crystals

Elegance and luxury best describe the lamps of the Crystella collection. The beauty of the lamps stems from the use of thousands of small Swarovski crystals that reflect and refract light with an impressive sparkling effect.

Crystella Wall shines in both directions and projects spectacular rays on the wall. The small crystals work best with a cool white light source.

Input voltage 230V AC / 50-60 Hz:
2 x 4W LED brand SEOUL
3000K | 4000K | 6000K
non-dimmable

Code	
12V DC	● Warm white: CRW-70-12-WW
	● Natural white: CRW-70-12-NW
	○ Cool white: CRW-70-12-CW

230V AC	● Warm white: CRW-70-230-WW
	● Natural white: CRW-70-230-NW
	○ Cool white: CRW-70-230-CW

material: stainless steel | glass | Swarovski crystals weight: 3,7 kg

CE UKCA IP20 12V DC / 230V AC

Crystella Wall 50

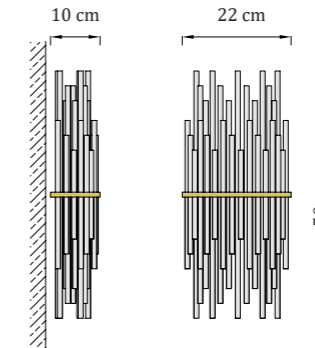

golden gloss

wall lamp | interior
operating temperature: - 10 to 50 °C

Light source

Input voltage 12V DC:
2 x 5W LED brand CREE
3000K | 4000K | 6000K
dimable (control not included)
power supply not included

Input voltage 230V AC / 50-60 Hz:
2 x 4W LED brand SEOUL
3000K | 4000K | 6000K
non-dimmable

Code	
12V DC	● Warm white: CRW-50-12-WW-G
	● Natural white: CRW-50-12-NW-G
	○ Cool white: CRW-50-12-CW-G

230V AC	● Warm white: CRW-50-230-WW-G
	● Natural white: CRW-50-230-NW-G
	○ Cool white: CRW-50-230-CW-G

material: stainless steel | glass | Swarovski crystals weight: 2,8 kg

CE UKCA IP20 12V DC / 230V AC

Crystella Wall 60

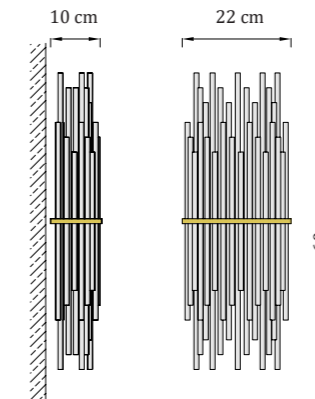

golden gloss

wall lamp | interior
operating temperature: - 10 to 50 °C

Light source

Input voltage 12V DC:

Calidos

wall lamp

crafted of hand-blown glass

With its shape and color, Calidos evokes a flame that lights up any space gently and creates a pleasant warm ambiance.

The beauty of the lamps originates from the slight differences between the shapes of the flames and the shade colors, infusing each piece with individuality.

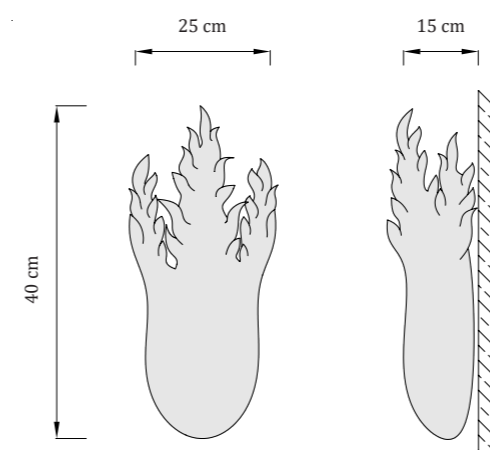

Calidos

wall lamp | interior

operating temperature: - 20 to 60 °C

material: stainless steel | glass

weight: 3,6 kg

Light source

LED bulb E14
3000K
6000K
non-dimmable

Code

● Warm white: CAL-AM-WW
○ Cool white: CAL-AM-CW
